U.K. COMPUTERS IN TEACHING INITIATIVE
SPECIAL ISSUE

	v	Editorial
	vii	Editorial
Jonathan Darby	1	Computers in teaching and learning in U.K. Higher Education
Peter G. G. Miller and Neil M. Hamilton	9	Computers in teaching and learning biology
Roger P. Gladwin, Don Margerison and Steve M. Walker	17	Computer-assisted learning in chemistry
D. A. McAlpin	27	Software for teaching computing
P. R. Smith	37	Computer mediated learning in engineering education
Simon B. Heath and Clive P. L. Young	49	Using computers to add value to learning in land use studies
Richard A. Bacon	57	The use of computers in the teaching of physics
Phil Hobbs and Guy Judge	67	Computers as a tool for teaching economics
David J. Unwin	73	Computer assisted learning in geography
Bryan Glastonbury and Jackie Rafferty	79	Learning social work with a "well-tempered personal computer"
Nick Hammond and Annie Trapp	87	CAL as a Trojan Horse for educational change: the case of psychology
Duncan Timms	97	Computers and the teaching of sociology and the policy sciences
G. Roland Kaye and Ailsa H. S. Nicholson	105	An educational framework for information technology in accounting and management education
Abdul Paliwala	113	Transforming legal learning
Jack Meadows and Fytton Rowland	125	Computers in the teaching of library and information studies in the United Kingdom

Pam Bishop, Mike Beilby and Adrian Bowman	131	Computer-based learning in mathematics and statistics
Malcolm Waterfield and Susan Furber	145	Computers in teaching medicine
P. Perkins, D. A. Spaeth and R. H. Trainor	153	Computers and the teaching of history and archaeology in higher education
June Thompson and Graham Chesters	163	CALL for all
Anthony Pople	173	Computer music and computer-based musicology
M. Deegan, S. Lee and C. Mullings	183	Computing in textual studies
Jonathan Darby	193	The future of computers in teaching and learning
Announcement	I	

Number 3

Charles Crook	199	Young children's skill in using a mouse to control a graphical computer interface
Lawrence A. Klein Michael J. Cerullo and M. Virginia Cerullo	209	Integration of the microcomputer into the changing accounting curriculum: an analysis of recent findings
Roy Martin Richards and Clive C. Sanford	219	An evolutionary change in the Information Systems curriculum at the University of North Texas
Michael Wood	229	Using spreadsheets to make statistics easier for novices
G. P. Nikishkov and Yu. G. Nikishkov	237	FEMTR—finite element educational code
Michael T. Tang and Charles W. McNichols	247	The use of oral communication approaches to enhance the instruction environment for MIS classes
Philip Swann	251	Computer Assisted Language Learning for English as a Foreign Language
K. V. Ramani	267	Graphics based instructional software for decision tree analysis using Bayesian methodology
Shirley A. Becker, Gene G. McGuire and Larry R. Medsker	275	Integrating systems development theory and practice in an Information Systems curriculum
Vilson J. Leffa	285	Reading with an electronic glossary

Albert C. Tuijnman and Alfons C. A. Ten Brummelhuis	291	Determinants of computer use in lower secondary schools in Japan and the United States
Manfred Lang	301	Computer readiness of teachers
E. C. Anderssen and C. P. H. Myburgh	309	The acquisition of operating systems concepts by computer science students

Number 4

Issaka Ndekugri and Peter Lansley	321	A real life simulator for construction site management
Antonio Gisolfi, Antonina Dattolo and Walter Balzano	329	A fuzzy approach to student modeling
Christopher R. Wolfe	335	Using an authoring system to facilitate student-centered discovery oriented learning
Marie-Michele Boulet	341	Designing and developing an intelligent advisor system for transfer tasks in music
Kazimierz Kowalski	359	Expert system shells in student advising
Nasrollah Ahadiat	369	A study of work values of computer education in accounting
Ton de Jong, Joost van Andel, Mark Leiblum and Marcel Mirande	381	Computer assisted learning in higher education in The Netherlands: a review of findings
John Murnane	387	To iterate or to recurse?
Book Reviews	395
